As the leader of a great industry, Willard is held responsible, and rightly, for storage battery improvement, for storage battery service, and for giving all necessary help and information to the great car-

To make the new Willard battery owner's task easier, in addition to our responsibility for the quality of material and workmanship, we offer to all such as properly register the new battery at a Willard Service Station, a 90-day service free of charge, with full and complete printed information on every point the owner needs to know.

The Nation-wide Willard Service Organization was established and is maintained for the car-owner's benefit, to assist him in getting a really trained service by men who know their job.

The latest of many Willard contributions to battery improvement is the Still Better Willard with Threaded Rubber Insulation-an invention which entirely does away with what was previously an almost universal battery repair expense-reinsulation.

Our one objective is the car owner's complete satisfaction, and this we pledge to those who make or sell motor cars and to the millions of men and women who drive them.
